Nominations can be submitted anytime during the year. To be recognized at the current year's Fall Conference, please have nominations submitted (postmarked) no later than **August 31**. Nominations submitted after that date may not be recognized until the following year.

Examples of candidate's professional work, community contributions, personal awards, and continuing education:

Ashley is a role model for young professionals at Otak and within the community through her design work at Otak, affiliation with APWA, and community outreach. Ashley has 12 years of experience as a water resources engineer. She is a Professional Engineer, a LEED Accredited Professional, and an Envision Sustainability Professional. Ashley has been an APWA member for five years; she is currently an APWA board director, previously chair of the Water Resources committee and the Young Professionals committee. She recognizes the importance of attracting new talent to the engineering field and through her connections with local academic institutions; she regularly meets with students and academic groups. Each summer for the past 10 years, she has donated a week of her vacation time to serve as a counselor or administrator at the Satori Summer Camp for academically and intellectually talented middle school students. At Otak, she uses projects as teaching opportunities for younger staff by reviewing designs and reports with them. Ashley is also a member of Otak's safety and CAD coordination committees. Ashley has prepared many sustainable stormwater designs for municipalities, and her project experience includes LID and "green street" approaches in urban environments. She is continually advancing her knowledge about LID techniques related to stormwater management, so that she can advise on a variety of projects.
