

The Nature of Green Infrastructure

Vegetated Water Quality Facilities (VWQF)

Online Management Training

Clean Water Services now offers online training for managing vegetated water quality facilities. The training provides guidance on how to inspect and manage long-term maintenance of the facilities. Interested landscape maintenance contractors can earn their place on Clean Water Services' Vegetated Water Quality Management (VWQF) Preferred Contractor list.

The Nature of Green Infrastructure online lets learners earn their place on the list at their own pace, and on their own schedule, while they observe physical distancing. Learners receive a variety of benefits:

- Stay up to date on the latest practices for managing vegetated water quality facilities and stay on the Preferred Contractors list.
- Save money with properly maintained VWQF verses rehabilitating a facility left in poor condition.
- Reduce the workload for your staff and for agency inspectors, creating efficiency in the compliance process.
- Get a clear understanding of how to efficiently and successfully manage VWQFs.

Create an account on the Clean Water Learning online portal (cleanwaterlearning.org) to get started. Then, purchase the online course, "The Nature of Green Infrastructure." You'll explore the latest standards and practices through a series of informative videos.

Please share this course with anyone who may be interested in expanding their knowledge of VWQF management. Landscape maintenance contractors who pass the final test with a score of at least 70% can be placed on Clean Water Services' Preferred Contractor list.

Stay tuned for the Spanish version of this online course, coming soon.
