

Nathan M. Jones
Oregon State University
Geomatics

I am a senior studying civil engineering at Oregon State University. I grew up in Eugene, Oregon, and have a passion for the outdoors, including backpacking, mountain biking, and hunting.

My internship experience – two seasons with the U.S. Bureau of Land Management (BLM) in Eugene and three seasons with Western Federal Lands Highway Division (WFLHD) in Vancouver, WA – has provided me key skills and learning opportunities that have encouraged me to pursue a career in civil engineering, with an emphasis in geomatics engineering.

While at OSU, I have been very active in the ASCE Student Chapter and the steel bridge team, where I have served as the Professional Development Chair (2014), Steel Bridge Co-Captain (2014), and Vice President (current). Additionally, over the past two years I have served as an undergraduate research assistant working in the Infrastructure Materials Lab and Geomatics Research Group.

I am very honored to have been chosen to receive this scholarship award! Thank you for the wonderful support of my education.
