

Wyatt Dean

Oregon State University

My name is Wyatt Dean and I am entering my final year of the Civil Engineering program at Oregon State University. I first became interested in civil engineering in seventh grade. I loved math and science in middle school, so my parents encouraged me to pursue engineering. My grandfather, a civil engineer, also swayed my decision to become an engineer. I am thrilled that I was able to make my middle school dreams a reality once I reached college.

I've had several different jobs throughout school. I've worked as a secretary at my dad's office, a farmhand at a local farm, an intern at OBEC Consulting Engineers, and am currently a CECOP intern at Clean Water Services. It has been an exciting journey as I get closer and closer to my career job.

I like to do many things outside of school and work. I've lived my whole life in Oregon, and love exploring the state. I enjoy playing golf, disc golf, backpacking, hiking, building model cars, solving Rubiks® cubes, as well as many other outdoor activities. I am also on OSU's table tennis club.

In the future, I plan on obtaining a Bachelor's Degree in Civil Engineering and a Master's Degree in Structural Engineering. My ultimate goal is to design bridges for a consulting firm. I appreciate the opportunity you have given me to continue to pursue my dreams! Without the help of scholarship donors, I may not be where I am today!
