

Nicholas Hossley

Oregon State University

Geomatics/Geotechnical

I am going to begin my junior year at Oregon State University next fall, and am expected to graduate in the spring of 2019 with my bachelors in civil engineering. When I am not working or busy with school, I love to explore the outdoors by hiking, mountain biking, skiing, and running.

The summer after my high school graduation from North Bend High School in June 2015, I had my first internship with Coos Watershed. My responsibilities included road quality and erosion surveys, and performing Geomorphic Road Analysis Inventory Package (GRAIP) surveys in the Coos Watershed Basin. In the summer of 2016, I continued to build my experience and hands-on learning through an internship with Federal Highway Administration in the Western Federal Lands Highway Division(WFLHD) in Vancouver, WA. I worked under a professional engineer learning highway design and preparing erosion control and temporary traffic control plans. This summer I was with WFLHD as an inspector on a bridge project near Bend, OR.

My time at Oregon State University has also been filled with experiences in and out of the classroom. When I began classes at OSU the fall of my freshman year I immediately got involved with ASCE by being appointed the freshman class representative of the student chapter. This past year, I was elected executive chair of ASCE and oversaw logistics for a student conference in Idaho, and I had the opportunity to lead a sidewalk repair project on campus. This spring I was elected ASCE Student Chapter President for the 2017-2018 school year. I am excited to lead our club this next year, and continue the hard work of the past presidents that made our club a successful and engaging organization.
