

Allyson Lowe

Oregon State University Civil Engineering Scholarship

My name is Ally Lowe and I am finishing my degree in civil engineering from Oregon State University. Outside of classes I work for the Geo-spatial Information Services Department as an AutoCAD and GIS assistant, and I am also involved with ASCE and AGC. Along with those activities I enjoy doing anything outdoors from horseback riding to hiking, while also playing for the OSU polo team.

After graduation, I hope to work in the construction industry for a few years to gain experience building and be able to see the project transition from design to real life. During that time, I will be working towards my PE in the hopes of working for a design firm. One of my long-term goals is to help develop more seamless relationships between engineers, architects and contractors.

I am so excited to see where this degree takes me and I am looking forward to the future!
