

Elizabeth Hamilton

Oregon State University

Don and Cathy Schut Scholarship

Currently, I am studying at Oregon State University to obtain a major in civil engineering and minors in environmental engineering and French. This spring I will be finishing up my undergraduate degree and heading out into the work world.

I hope to find a career that handles water resources, and preferably one in public service. Through engineering I would like to aid in finding innovative solutions with harmonious human environment interactions.

Thank you APWA for supporting me as I pursue my passions and goals!
