

## **Kristi Woods**

Kristi Woods received a \$500 civil engineering scholarship at Umpqua Community College. She is pursuing an associate's degree in civil engineering and plans to pursue a four-year degree at OIT in the geomatics/surveying program.

"I chose civil engineering based upon the intrigue and challenging nature it promises," says Kristi, who notes that she took welding and automotive classes at Roseburg High School and placed second in an oxy-acetylene welding competition.

"My goal is to succeed academically and in my upcoming career. With the skills learned, I intend to use them in my career to give back and better my community."

"I would like to express my appreciation for the scholarship I was awarded. Thank you very much! "
