

Levi Warriner

Polvi Sustainability Scholarship Oregon State University

I'm 20 years old and was born in Salem, Oregon, but moved to Silverton when I was 10 years old. I love sports including soccer, football, basketball, and baseball. In high school I played basketball for four years and baseball for two. I enjoy playing golf regularly and I recently started snowboarding. I also love being outdoors and having fun.

Silverton is a rural community and for the past eight summers I have worked on a farm. Working on a farm has developed my work ethic, leadership, and communication skills. It has taught me to work hard, but to work hard smartly and efficiently. I have gained valuable information from working on a farm and I want to continue my education in farming so I have a minor in Agricultural Sciences.

I am going to be a junior in the Civil Engineering program at Oregon State. I have narrowed my focus down to water resources, geomatics, and transportation engineering. I've always been fascinated with civil engineering since I was a kid playing with my Legos. I enjoyed designing the structures and destroying them to see if I could make them better.

I am grateful to receive the Polvi Sustainability Scholarship. The scholarship will help me accomplish my goal of becoming a civil engineer and to develop a brighter future for communities.
