

# Stephen Randall

## *Oregon Institute of Technology*

My name is Stephen Randall and I attend Oregon institute of Technology. Currently I am a junior in the geomatics program.

I chose surveying because I enjoy math, technology and love being outside. Currently I am in an internship with the Oregon Department of Transportation as a surveyor.

This has been a very challenging experience for me because I am a nontraditional student. Going back to school to get my bachelor's degree and raising my son on my own has presented some really hard challenges. The instructors at OIT have been a huge part in my success. This scholarship will help me reach my goal as a surveyor. Thank you Oregon APWA for your generosity.
